

The Colorado Community College System established the CCC Standardized Test Matrix for Award of Credit to facilitate processing of requests for awarded credit and transfer of awarded credit among state community colleges.

General Guidelines

1. This matrix is used to evaluate award of credit for the following examinations:

CLEP (College Level Equivalency Program)

DANTES (Defense Activities for Non-Traditional Educational Support)

APP (Advanced Placement Program)

ECE (Excelsior College Examinations from Jan 2001 on) (formerly RCE)

RCE (Regents College Examinations from Sep 1998 to Dec 2000) (formerly ACT-PEP)

ACT-PEP (American College Testing-Proficiency Examination Program from START DATE to Aug 1998)

2. Awarded credits must apply to degree and certificate requirements.

3. Awarded credits cannot be used to fulfill residency requirements.

4. Awarded credits may be granted for Transfer Core courses but may not count toward the completion of the Core Curriculum (Core Stamp).

5. Transfer of Awarded Credit

Credit awarded by any state community college based on this test matrix may be transferred to any other state community college without additional evaluation of official test scores as long as general requirements for receipt of awarded credit are met.

Transfer of awarded credit to other colleges and universities is determined by the policies and procedures at the receiving institution and could require the student to submit official test scores for re-evaluation.

6. Colleges have the authority to submit other standardized tests – those not appearing in the matrix in either “Approved for Award of Credit” or “Not Approved for Award of Credit” sections – for faculty review for award of credit. In such cases, technical information about the standardized test will be provided to the appropriate discipline faculty for their evaluation of equivalency to a specific course and minimum acceptable score.

The state Credit for Prior Learning Committee (CPLC) is currently investigating the International Baccalaureate (IB) examinations for possible inclusion in this test matrix. Until that review is completed, colleges may follow these faculty review procedures to individually evaluate score submissions. The CPLC recommends award of credit for scores of 4 or higher for both Standard and Higher Level IB exams.

Explanation of Column Headings

Exam Name	The complete title of the standardized test as it should appear on the student's score report.
Dates	The first date indicates the adoption date by state faculty. The ending date listed for some exams indicates when that exam was no longer given by testing centers. Tests currently in use show no ending date. Note to evaluators - Exams taken prior to the Standardized Test Matrix's beginning effective date can be sent to the appropriate discipline faculty for review for award of credit per individual institution's discretion.
Course #	The prefix and number of the specific course for which credit will be awarded.
Course Title	The title of the specific course for which credit will be awarded.
Semester Credit	Exact credits (or variable credits) of the specific course for which credit will be awarded.
Score	Minimum acceptable score for award of credit.

Explanation of Asterisks

- * Indicates that the **score is higher** than the recommended score of the American Council of Education for the awarding of credit. The score was determined by Colorado community college faculty review.
- ** Indicates that **credit varies** by institution. This entry generally reflects the minimum and maximum limits for credit as established by the common course descriptors. Credit is determined by individual institutions within these parameters.
- *** Indicates those **courses** taught at several colleges in the system but **not commonly described**. Colleges are to use the course number they locally assign to the course. No credit is awarded if the college does not teach the course unless a transfer situation from another Colorado community college exists.
- **** Indicates that the test equivalency has been established but that no minimum score has been approved for the new CLEP scoring system. Schools should not give awarded credit for this examination until the score is established.
