Students and society as a whole enjoy a range of benefits due to their educational investment in ACC. A portion of these benefits accrues to state and local taxpayers in the form of higher tax receipts and a reduced demand for government-supported social services.

**ACC INCREASES TAX REVENUE**
- Approximately 97% of ACC’s students remain in Colorado upon completing their educational goals. As students earn more, they pay higher taxes. Employers also pay higher taxes through their increased output and spending.
- Over the students’ working lives, state and local government in Colorado will collect a present value of $248.1 million in the form of higher tax receipts.

**ACC REDUCES GOVERNMENT COSTS**
- ACC students who achieve higher levels of education are statistically less likely to have poor health habits, commit crimes, or claim welfare or unemployment benefits.
- The improved lifestyles of students result in a reduced demand for government-supported services. Better health leads to reduced health care costs. Reduced crime leads to a reduced burden on the criminal justice system. Further, increased employability leads to fewer claims for welfare and unemployment benefits.
- As a result, taxpayers in the state of Colorado will see a present value of $10.3 million in savings to government over the students’ working careers.

**ACC IS A SOLID INVESTMENT FOR STATE AND LOCAL TAXPAYERS**
- In FY 2015-16, state and local taxpayers in Colorado paid $18 million to support the operations of ACC.
- For every $1 of public money spent on ACC, taxpayers receive a cumulative return of $14.30 over the course of students’ working lives in the form of higher tax receipts and public sector savings.
- Taxpayers see an average annual internal rate of return of 32.5% on their investment in ACC. This return compares favorably with the 0.7% discount rate used by the federal government to appraise long-term investments.
