

TAXPAYERS' INVESTMENT

The Economic Value of Northeastern Junior College | May 2017

Students and society as a whole enjoy a range of benefits due to their educational investment in NJC. A portion of these benefits accrues to state and local taxpayers in the form of higher tax receipts and a reduced demand for government-supported social services.

NJC INCREASES TAX REVENUE

- Approximately **76%** of NJC's students remain in Colorado upon completing their educational goals. As students earn more, they pay higher taxes. Employers also pay higher taxes through their increased output and spending.
- Over the students' working lives, state and local government in Colorado will collect a present value of **\$18.5 million** in the form of higher tax receipts.

NJC REDUCES GOVERNMENT COSTS

- NJC students who achieve higher levels of education are statistically less likely to have poor health habits, commit crimes, or claim welfare or unemployment benefits.
- The improved lifestyles of students result in a reduced demand for government-supported services. Better health leads to reduced health care costs. Reduced crime leads to a reduced burden on the criminal justice system. Further, increased employability leads to fewer claims for welfare and unemployment benefits.
- As a result, taxpayers in the state of Colorado will see a present value of **\$1.3 million** in savings to government over the students' working careers.

NJC IS A SOLID INVESTMENT FOR STATE AND LOCAL TAXPAYERS

- In FY 2015-16, state and local taxpayers in Colorado paid **\$12.9 million** to support the operations of NJC.
- For every \$1 of public money spent on NJC, taxpayers receive a cumulative return of **\$1.50** over the course of students' working lives in the form of higher tax receipts and public sector savings.
- Taxpayers see an average annual internal rate of return of **3.1%** on their investment in NJC. This return compares favorably with the 0.7% discount rate used by the federal government to appraise long-term investments.
